### Community Service Committee

**Vision:** The philosophy of the Community Service Committee (CSC) stems from the philosophy of the University as a whole, and the College of Nursing-Jeddah (CON-J) in particular. It involves strengthening the role of the CSC in creating a stimulating environment for preparation and delivery of health awareness programs as well as constant interaction with all segments of the society, especially disadvantaged and underserved groups, in order to raise the level of health awareness among population.

**Mission:** The CSC strengthens the interaction and relationship between CON-J and all segments of the community for effective contribution to creating a health-educated community. The CSC will facilitate the dissemination of knowledge and health awareness among populations, using scientific methods and with support of health personnel who are expert in providing health services and awareness for community groups.

#### Objectives

1. Continuity of communication between the CON-J and the community as a whole through conducting free-of-charge health fairs for different population categories in the community, especially the underserved and at-risk populations. These services will be offered in coordination with other local health teams that provide free health awareness services to different groups of residents.
2. Increase the availability of health information to different groups in the society through health educational lectures, training, programs for school children and teachers; university and community college students; women at childbearing age; patients and families suffering from chronic diseases; people with special needs and handicaps; kindergartens staff for safe handling of children; youth and teenagers to raise awareness about effects of unhealthy lifestyles; and elderly people especially those at risk for health problems and injury.
3. Create health information Databases documenting the community service and volunteer activities of the college, especially those related to health services area, to enable the college to use the information for scientific research and health reports and evidence-base planning.
4. Build cooperative/collaborative relations with local sectors working on development of awareness and promotion of the health of citizens and residents through getting external support from informal or formal agencies (in the form of material and moral support); and encouraging the local community to support the activities of the committee and facilitate the implementation of its plans.
5. Activate participation in the international health days such as outreach community activities.
